A STRAIGHT-BOOM WITH A TELESCOPIC JIB

The New Telescopic Platform H28 TJ+

Haulotte Group, the global manufacturer specializing in people and material lifting equipment, has used its expertise to respond to customer needs with the launch of the innovative Telescopic Big Boom H28 TJ +.

A reputation you can trust

➤ **Technology based on historical expertise**

HAULOTTE Group was created from the merger of two industrial companies with recognized expertise in their markets: Pinguely and Haulotte respectively established in 1881 and 1924. Throughout their history, the companies have learned to adapt their engineering skills to respond to the needs of their markets (locomotives, mechanical diggers, derricks and mobile cranes). After 120 years of innovation, creativity and imagination, Haulotte Group became a benchmark in the people and material lifting equipment markets.

➤ **Expertise in the Access Platforms Industry**

Models are designed and developed in-house, in order to meet customers' needs and to ensure their total satisfaction.

Innovation

Additional 'flexibility'

The new Big Boom H28 TJ+ has a telescopic jib which offers a 6m additional reach to work in the most challenging working environments

➤ **A significant increase in productivity**

In every respect, the new big boom H28 TJ + makes your work easier and allows you to operate in a wider range of working environments

+ With an outreach of 23 m

- + With simultaneous movements
- + With a 2.44 m platform
- + With the capacity to rapidly lift heavy loads (Up to 350 kg).
- + With a 6m telescopic jib with proportional controls that allows the operators to reach the most inaccessible areas.

➤ **Established operator comfort**

Thanks to its proportional movements and its self-leveling system, the operator has maximum working comfort.

The boom and the jib, with its octagonal cross section in high elastic modulus steel, are exceptionally rigid, providing greater stability to the H28 TJ + for improved operator comfort. The big boom H28 TJ + benefits from the next generation control panel used in the H43TPX.

➤ **A wide range of working environments**

The new big boom H28 TJ + has a narrow fixed-width frame, an oscillating axle and a differential wheel lock to allow for operation in a wide range of areas.

Offering a maximum safety level, the big boom H28 TJ + complies with the working regulations (EN 280, ANSI, CSA, AS....)
