

Press Release

HA 41 PX – Articulating big boom

Placing the client and innovation at the core of the company's mission, has enabled, the world's number 3 manufacturer of aerial work platforms, to develop a complete range of more than 60 models.

This drive to innovate gives rise to numerous new machines every year and makes Haulotte Group the specialist of people and material lifting equipments.

Designed to meet all working requirements at heights of 41m, the **HA41PX** platform is particularly suited to construction work, the ship building industry, the oil industry... and many others applications where height and outreach are required.

➤ Complete safety, and easy of operation

Continuous optimum movement management, new platform load controller, 4° tilt alarm operating in all positions, hydraulic platform compensation, stability management in all positions. The control panel ensures perfect data transmission maximising reliability.

➤ Manoeuvrable and accurate

Fully proportional, simultaneous controls for more accuracy and smoothness of movement and optimal performance in all working positions

➤ Compact and steerable

4-wheel drive, 4-wheel steering, with oscillating extendable axles, the tightest turning radius on the market, simultaneous controls and ground clearance of 38cm, combined with its compactness makes the HA 41 PX a remarkable rough terrain machine.

➤ Productive

Lift to 41m in record time. The **HA41PX** uses its high articulation point (17.75 m) to negotiate around obstacles and is designed to achieve perfect optimization of the movements of the arm.

An articulating boom with 140° fly jib and platform rotation of 180° means the **HA41PX** is ideal for use on even the most difficult to access building projects where outreach is necessary.

➤ **Easy to maintain**

With easy access to all components, the maintenance operations are extremely simple and fast ensuring the machine is kept in peak condition.

Offering maximum safety, the **HA41PX** complies with the latest labour regulations, to European (EC marking, EN 280) and also international standards (ANSI, CSA, AS ...).
